

## **Math Transitions from Fifth to Seventh Grade**

On **Wednesday, March 20th, from 7-8:30**, the Director of Mathematics will present about the transition from fifth grade to seventh grade, specific to the mathematics department options and pathways. The primary audience of the event is families that have children entering sixth or seventh grade during the 2019-2020 school year. All are welcome though.

Topics will include:

1. Bypassing Math 6 for extreme high achievers. The structure and timeline for this opportunity will be outlined.
2. The Math Support Intervention Program for grades six through eight.
3. Digital Media and Literacy, computer programming classes for sixth through eighth graders.
4. Pathways and courses for grades six through twelve. Basically, planning ahead and learning about six through twelve mathematics in the Arlington Public Schools.

The majority of the event will cover the first two topics as this event will have a transitional focus. **The event will be held at the Gibbs School.**
